

StaySafe with V.BTTN

The easy to use, wearable button for discreet panic, check-in and man down alerts

Need the functionality of the StaySafe app in a wearable device? The StaySafe app can be paired via Bluetooth with the V.BTTN, a small, versatile device which can be worn by lone workers and used to discreetly check-in or signal for help at the touch of a button. The device also detects falls from height and sends a man down alert to a monitor even when the user can't.

Pairing your device with V.BTTN is a great solution for anyone working in fast paced, social or industrial work environments where pushing a button may be a more convenient way of using the StaySafe app.

The V.BTTN can be worn as a wrist watch, on a pendant, stuck to a vehicle dashboard or clipped on to clothing – making it ideal for staff who need the protection of the StaySafe app and the discreet, easy access of a wearable device.

Discreet
Panic

Send a panic alert discreetly and out of view when faced with a difficult situation.

Quick and easy
to access

Continue to use the app away from your phone at the touch of a button.

Dust and
weather proof

Durable technology makes it suitable for use in any work environment.

Convenient
to wear

Three accessories so you can wear it in the way that is most convenient for you.
